RE: Poor Boy Claims, DOE/019/024, Grand County, Utah

On January 7, 1985, Mr. H. R. Davidson of Dav-Tex Corporation called to request a DOE form for a proposed test mill in Grand County. During our discussion he informed me that he had bought Bob Barnes' property along the Colorado River. He indicated that he did not intend to pursue mine development on the property but that he would probably do some testing in the area over the next month or so.

Mr. Davidson also indicated that he intended to reclaim the previous disturbances on the site. He stated that he would be willing to seed the area this spring with a mixture recommended by the Division. He also stated that he would like Division personnel to visit the site to ensure that the work was being properly done, preferably sometime in February.
